WORK EXPERIENCE

Senior Product Manager | Samsung R&D Institute India-Bangalore | Bengaluru , India | Mar '24 – Jun '26

- Owned product strategy and annual roadmap for Samsung Finance+, leading end-to-end customer and merchant experiences across Samsung apps, NBFC APIs, backend services, and device-level integrations; scaled the platform to 50K+ daily applications and 1.3M financed devices annually, generating \$400M+ in annual financed sales.
- Influenced executive stakeholders across Samsung Electronics India, Samsung R&D (Bengaluru & Noida), and multiple financing partners to define product roadmap and deliver strategic initiatives.
- Defined API contracts and product requirements across Samsung and financing partners, integrating lending, risk, payment, device provisioning, and locking systems to streamline the end-to-end financing journey
- Provided product leadership and mentorship to junior product managers, guiding product discovery, roadmap planning, requirement definition, and cross-functional execution while fostering product management best practices.
- Re-engineered the lending journey, reducing application completion time by 5–10 minutes through workflow optimization and removal of in-store device bottlenecks, resulting in a 15% increase in leads and 10% growth in sales.
- Led the evolution of device-locking capabilities, including Graded Defeaturing, collaborating with device and firmware teams to address fraud vulnerabilities and enable secure, granular device restrictions; contributed to reducing delinquency from 15% to 4%.
- Expanded Samsung Finance+ beyond smartphones by launching financing for consumer electronics, enabling over 5K refrigerator sales and 2K+ sales each across TVs, washing machines, and air conditioners.
- Improved approval rates by 15% and maintained industry par offer rates by improving the journey, onboarding additional partners.
- Increased premium smartphone sales by 10% through the launch of the Galaxy Upgrade Program, enabling customers to own flagship devices through annual upgrade financing.
- Launched financing for accessories and insurance, achieving approximately 20% attach rates across both product categories.
- Expanded the transacting dealer base by 15%, increased application creation by 20% by launching a mobile-first dealer application.
- Built and scaled a campaign management platform from scratch across 7 countries, integrating customer/CRM data and APIs to enable personalized segmentation and targeted campaigns; supported ~150 campaigns annually across global teams, increasing conversion by 5% and revenue by 9% while reducing campaign launch time by 50%.
- Built an AI-powered dealer support experience to diagnose and resolve stalled customer loan applications, replacing manual WhatsApp-based escalation workflows and reducing issue resolution time from 30 minutes to 5 minutes.

Product Management Consultant | Boston Consulting Group | Gurugram, India | Jan '23 – Dec '23

- Defined product strategy and portfolio recommendations through market analysis, competitive benchmarking, customer research, and product performance assessment across multiple business domains.

- Partnered with business and marketing leaders to shape product roadmaps, pricing, and go-to-market strategies aligned with commercial objectives. Prioritized product roadmap using RICE and value–effort analysis, balancing customer impact, commercial value, technical complexity, and strategic objectives.
- Established product KPIs and performance measurement frameworks, enabling data-driven prioritization and continuous optimization of product health.
- Improved platform adoption by prioritizing high-impact initiatives, resulting in a 50% month-over-month increase in platform usage and a 75% increase in specialist engagement.
- Implemented product health dashboards & KPI mechanisms improving onboarding efficiency and increasing customer return rates.

Senior Product Manager (Data) | Byrd GMBH | Berlin, Germany | Aug'22 – Nov'22

- Led product discovery, market assessment for logistics platform, identifying customer pain points, validating new opportunities.
- Developed business cases and product recommendations collaborating with stakeholders to prioritize roadmap investments.
- Improved platform reliability and operational performance by defining service metrics, SLAs, and driving continuous improvements.
- Introduced Agile product practices across Data Analytics and Data Engineering teams, improving sprint planning, prioritization.

Product Consulting & Travel | Europe | Sep'21 – Jul'22

- Spent 10 months travelling across Europe while delivering short-term product consulting engagements, gaining exposure to international markets, B2B SaaS products, and cross-cultural customer needs.
- Product Manager | Velory AB (IT Asset Management), Stockholm, Sweden.

Product Manager | McKinsey & Company | Gurugram, India | Jan'20 – Aug'21

- Defined product strategy and go-to-market roadmap for a healthcare platform, increasing user adoption by 15% through customer journey improvements by field research, stakeholder interviews, and usability studies, and marketing collaboration.
- Led digital transformation initiatives for healthcare clients by redesigning offline-to-online customer journeys, increasing platform transactions by 15% through cross-selling and experience optimization.
- Mapped customer journeys through field research, usability studies to design an online car-loan journey for a bank, contributing to a 10% increase in market share.
- Defined product scope, prioritized MVP features, and partnered with cross-functional teams to deliver customer-centric solutions focused on business growth and operational efficiency.
- Coached client product teams on product discovery, Agile delivery, roadmap planning, and product management best practices.

Product Manager | Paytm – Insurance | Noida, India | Aug'17 – Dec'19

- Built and launched Paytm's Insurance Marketplace, increasing GMV by 40% and insurance transactions by 30% through marketplace expansion and partner onboarding.
- Increased conversion by 25% by enabling customers to seamlessly resume their purchase journey across multiple platforms.
- Reduced policy cancellations from 15% to 5% through policy modification capabilities and price-based cross-selling.
- Launched self-service policy management portal, reducing customer escalations by 25% and significantly improving turnaround time and customer experience and improved NPS from 7 to 9.
- Expanded insurance distribution by enabling Paytm Mall merchants to sell contextual insurance products alongside purchases.
- Leveraged data and partner integration to increase adoption by almost 30% for vehicle insurance categories leading to GMV increase of 13% and reduced drop-off by 20%

Product Manager | Paytm – Payments, Commerce & Discovery | Noida, India | May '15 – Aug'17

- Owned end-to-end customer and merchant journeys across bill payments, transit, tolls, utilities, education, and recharge categories.
- Reduced category launch time from 3 days to 1 hour by building a configurable onboarding framework.
- Established metrics including conversion, bounce rate, repeat usage, and transaction time to drive continuous product optimization.
- Improved transaction completion time by 25%, increased repeat customer usage by 20% through customer journey enhancements.
- Optimized Paytm's search and discovery platform by defining search APIs, ranking logic, and ML-based keyword-intent mapping, while building contextual personalization and rules-based recommendations using search, click-through, product-view, and purchase signals; improved conversion and drove 20–40% growth in sales.

Java Developer | SapientNitro | Gurugram, India | Nov'12 – May'13

EDUCATION

- Post Graduate Diploma in Management (equivalent to MBA) | IIM Calcutta | 2013-15
- BE (Computer Science) | Delhi College of Engineering (now Delhi Technical University) | 2008-12
